Preface

Not all of the recipes in here follow a low carb or the low glycemic path. However all of the recipes contained herein are sugar free for the most part and are designed for Diabetics or persons who suffer from hypoglycemia. These are great recipes if you are on a “controlled” carb diet. This means you are not putting your body into a state of Ketosis but, you are watching your carbohydrate consumption as well as blood sugar levels.

Here are a few tips when using our products.

When baking with pure Steviva Brand Stevia Powder mix 1/8 of a teaspoon with 1 cup of unsweetened apple sauce. Because stevia is 250 times sweeter than sugar you lose a lot of volume from replacing the sugar.

When recipes ask for brown sugar you can use an equal amount of Steviva Brand Stevia Blend with 2 tablespoons of molasses added. If you are not using the blend and need a brown sugar substitute then you can use 1 cup of unsweetened apple sauce 1/8 of a teaspoon of Steviva Brand Stevia Powder and 2 tablespoons of molasses.
